MS4 Permit Requirements and Meetings:

The first Planning Workshop for the proposed Stormwater Chapter was held on March 26th. The Planning Board requested changes to the document, but overall the Board was pleased with the Chapter.

The York County MS4 Group met on March 26th at the South Berwick Library. There were quite a few items on the agenda to discuss. David Ladd, DEP monopolized a good portion of the meeting so we were unable to go through everything. We did discuss construction inspection training for the CEO with will be on April 14th or 21st at the York Library.

MS4 MINIMUM CONTROL MEASURES:

Public Education & Outreach on Stormwater Impacts:

Atlantic Design here in York, hosted a workshop titled "The Living Lawn" on March 14th. Both Kristie and I attended. Lawns to Lobster totes, rulers and brochures were available for the taking. We will be doing a Lawns to Lobster workshop at the same site sometime in June.

Public Involvement & Participation:

Illicit Discharge Detection & Elimination:

On March 6, 2015, the Town submitted its response to EPA along with an Illicit Discharge Tracking and Elimination Spreadsheet showing our plans for subsequent investigation, and

maps showing current infrastructure in the areas of investigation. All are posted on the Town's website under Stormwater/MS4.

Construction Site Stormwater Runoff Control:

There are currently no projects with soil disturbance greater than 1 acre.

Post-Construction Stormwater Management (New and Redevelopment):

Pollution Prevention/Good Housekeeping for Municipal Operations:

On March 18th, Kristie and I meet with Zak Harding, School Department Facilities Director, along with Tim Haskell and Mike Tibbetts of the Sewer District to review the Operation and Maintenance documents (O&M's) for each school. During the site inspections for the O & M's, the question of the day was: "Which system receives discharge from the boiler drains?" The Sewer District offered to dye test each school. I will schedule a day and time with school staff and notify the Sewer District.

After the meeting with sewer and school, we performed a site visit at the Town Recycling and Transfer Station for the Oil Spill Prevention Control and Countermeasure (SPCC). This is required for any municipal facility that stores more than 1300 gallons of oil on the premises at any given time. Once the plan is completed it will be kept at the Transfer Station and monthly inspection will be performed by DPW staff.

Training/Conferences Attended in March:

Stormwater Utility Workshop (Dylan Smith, Town Planner & myself) - Chelmsford, MA

Respectfully submitted,

Leslie Hinz, Stormwater Manager
