Re: York Police Department

Dear Mr. Johnston,

This letter is to confirm that the York Water District has sufficient capacity to serve this project.

Thank you for supplying the PDF Plan of York PD, I will forward along to our Engineers at Wright Pierce. They will briefly review and develop a written proposal to formally review the plan to make sure the proposed design will meet the District's standards regarding minimum pressures, fire flows, main sizing and whether "looping" will be required. It will be helpful to know the anticipated sprinkler demand in advance of the plan review. As I mentioned it is important to size the fire service properly to meet the required flow as the District will bill the Town of York quarterly based on the size of main entering the building.

As requested the District will order a hydrant fire flow test. I will forward you the results as soon as available. (I will plan to fold the cost of the flow test into the plan review portion of this project)

We should discuss the construction process when you have time. The short version is,
When the final plan is completed;

- YWD will complete a material takeoff for the portion to be owned by the YWD. To include all water mains in the public right of way. (plus possible loop portion)
- YWD will need your contractors cost for installation of the portion to be owned by YWD only (per foot in earth/ledge or lump sum)
- YWD will prepare a cost estimate and contract between YWD and TOY.
- YWD will require a deposit for the full amount of the estimate in advance.
- YWD will prepare a contract between the YWD and Installation contractor.

Please contact me with any questions or concerns.

Respectfully,

Donald D. Neumann Jr.
Superintendent
York Water District

Re: New Police Department Building Ability to Serve

Dear Mr. Johnston:

Based on your estimate of 2500 GPD projected flow for the new public safety facility, the District will have no issues servicing the site once a final plan of conveyance has been approved.

Please let me know if you have any other questions or if we can help in any way.

Sincerely,

Timothy H. Haskell
Superintendent
